

Traffic Controller and Implement Traffic Control Plans

This course is for any person who is required to control traffic using a stop/slow bat and who will be required to implement a traffic control guidance plan. Employers usually require workers to have both licences.

The course ensures that workers have a suitable level of professional knowledge and experience to ensure confidence in live traffic control situations.

Participants must

- Be currently employed in traffic control, or
- Arrange for work experience controlling traffic

You can not complete course without work in traffic control.

Initial Training > 2 days practical and theory training

The initial course is for participants who have never had blue/yellow cards OR have expired cards.

At the end of training, participants will be given a Statement of Completion (SoC) allowing participants to work on a site for 90 days while they complete assessment.

Participants need to complete 4 steps to assessment, after initial training is completed. These steps must be completed within 90 days of the training course.

4 Steps to Assessment

1. Complete a theory workbook and a log book back in the work place
2. Get their supervisor to complete documents about the participant's traffic control work
3. Provide workplace documents, including traffic plans, risk assessment etc and send them to LGTI 21 days before attending an assessment day
4. Book into an **assessment day at LGTI** to show their skills controlling traffic and setting out signs

Assessment days are run every second Friday.

You must have a current SoC and white card to attend an assessment day.

After successfully completing the 4 steps of assessment, participants will be sent a plastic licence by RMS, which can take up to 3 weeks.

If a student is not successful in completing all assessments satisfactorily or on time, they would need to rebook and pay the course fee.

**Need training and assessment at your site, anywhere in NSW?
Contact us for prices and information.**

Assessment Only > Recertification

For participants who:

- Have current blue & yellow cards/Traffic Controller & Implement Traffic Control Plans cards
- Are employed by an organisation that will allow them access to work in traffic control, or
- Can get access work experience controlling traffic on a worksite

Participants are sent an Assessment Workbook via email.

Participants then need to complete 4 steps to assessment. These steps **must** be completed before current cards expire.

4 Steps to Assessment

1. Complete a theory workbook and a log book in the work place
2. Get their supervisor to complete documents about the participant's traffic control work
3. Provide workplace documents, including traffic plans, risk assessment etc and send them to LGTI 21 days before attending an assessment day
4. Book into an **assessment day at LGTI** to show their skills controlling traffic and setting out signs

Assessment days are run every second Friday.

You must have current cards to attend an assessment day.

After successfully completing the 4 steps of assessment, participants will be sent a plastic licence by RMS, which can take up to 3 weeks.

If a student is not successful in completing all assessments satisfactorily or on time, they would need to rebook and pay the course fee.

It is recommended you enrol for recertification **3months before your cards expire** to give you enough time to complete all the assessments and to avoid cards running out.

Pre-requisites

Participants must provide:

- White card (construction induction card)
- Proof of ID (eg driver's licence)
- Unique Student Identifier (USI) number

Participants must be physically able to perform traffic control duties:

- Loading and unloading signage
- Placing and removing signage on road
- Using a stop slow bat and two-way radio at the same time

Participants must be able to read and write, including:

- Read signage
- Read work instructions, SWMS etc
- Read and interpret traffic control plans/maps
- Complete a range of forms, checklists
- Measure/calculate distances and vehicle speeds

Units

- RIIWHS205D Control traffic with a stop/slow bat
- RIIWHS302D Implement traffic management plan
- RIIWHS201D Work safely and follow WHS policies and work procedures
- RIICOM201D Communicate in the workplace
