

Safe Work at Heights 1 day

The course is a “hands on” course where participants can expect to get practice using heights safety gear and carry out risk assessment exercises within a team. Participants have the opportunity to practice emergency response and to develop risk assessment skills.

Topic include:

- risk assessment
- control measures
- selection, fit and use of equipment
- assessment of anchor points
- emergency planning and response
- inspection and maintenance of equipment

This course is idea for:

- Staff required to work at heights
- tradesmen
- supervisors of small work teams
- workers who require minimal supervision.

BML Worksafe Solutions have based their course on the requirements of the WHS legislation, Codes of Practice and the Australian Standards. BML's trainer is highly qualified and has more than 25 years' experience in height safety and confined space management. You can be confident of meeting your legal obligations as an PCBU, officer or worker.

Let us know prior to enrolment of any literacy or numeracy concerns. We are here to help!

All successful participants will receive a Statement of Attainment and a wallet card issued by BML Worksafe Solutions (RTO number 90812)

Participants must have:

- photo ID (list on next pages)
- white card
- Unique Student Identifier (USI) number

Unit covered

RIIWHS204D – Work Safely at Heights

Register and pay via lgti.com.au to attend BML's hands on, nationally accredited height safety training at LGTI's Thornton training centre.
