

Confined Spaces - Initial and Refresher

Duration: 1 Day of Face to Face Training

Course overview

This course provides the necessary skills to recognise a confined space, conduct a risk assessment, complete an entry permit, conduct atmospheric testing and perform a confined space entry operation under controlled conditions.

This course is ideal for:

Any staff working in a customer service or similar role that requires them to:

- Staff required to work in a controlled confined space environment
- Stormwater construction/maintenance crews
- Manufacturing plant process/maintenance crews + inspectors
- Defence employees
- Tradesmen
- Supervisors of small work teams
- Workers who require minimal supervision

Confined spaces are high risk workplaces, because their atmosphere can change quickly and without notice. Many are used for access to remote locations, or to perform inspections or maintenance. Confined spaces may include tanks, silos, manholes, pump stations, dry wells and reservoirs.

This course is based on the requirements of the WHS legislation, Codes of Practice and the Australian Standard AS2865. Our trainers are highly qualified and have more than

10 years experienced in confined space management. You can be confident of meeting your legal obligations as an PCBU, officer or worker.

Please note that this course does not include instruction on the use of breathing apparatus.

Let us know prior to enrolment of any literacy or numeracy concerns. We are here to help!

Units Covered:

RIIWH202E	Enter and work in confined spaces
------------------	--

Participants must provide:

- Photo ID
- White Card
- Unique Student Identifier (USI) Number
